Vision

OUR VISION:
to build stronger, healthier communities

Values

Our Values: Headline lorem ipsum tecum ludere

Ubuntu, Fun, Integrity, Diversity, Transformation, Quality, Inspiration, Innovation

Ubuntu is an African philosophical principle that underlies all we do. It states that a person is a person through other people, that we recognise our common humanity and our interdependence, that we are compassionate and respectful to all, and recognise the good of all above individual interest. I am who I am because of who we all are.
These values and principles guide us in all we do & with whomever we work

Achievements

Sustainability is the Goal:

Over time, SCORE aims to develop a self-sustainable, structured community sport system in each community in which we work. This is driven and supported by mostly young people we have trained and mentored and who represent and run sport in their own communities

Goal

Our long term goal in communities in which we work is to facilitate and support the establishment of sustainable sports organising structures.

We have a 5 phase intervention process:

1) **Participative Assessment & Planning**
2) **Access, Activity & Participation**
3) **Skills & Leadership Training (focusing on individuals)**
4) **Organisation Building & Development**
5) **Developing & Maintaining Networks of Support**

Training Pathway & the SCORE Leadership Ladder:

lorem ipsum tecum ludere

To achieve sustainable sports structures, SCORE has developed a training pathway with curriculum of sports skills, life skills and leadership skills training workshops and courses. We call this our "Leadership Ladder" and it's aimed at personal skills development through various levels. The initial focus of the training is on the individual and their own capacity and skills, the higher levels of training focus on the individual as part of an organisation. ining is theoretical and practical, learning skills and then using them to demonstrate competence and gain confidence in using new knowledge.
